

Protect Tribal Gaming Revenue

Advantage Play and Fraud No Longer Need to Be an Accepted Loss

The Reality on Today's Casino Floor

Modern casino cheating no longer relies on sleight of hand or obvious collusion.

It relies on technology.

Professional cheating operations increasingly use:

- Smart glasses and wearable displays
- Covert Bluetooth and cellular earpieces
- Off-floor analysts feeding real-time instructions
- Hidden hotspots and relay devices
- Side-channel communications that never touch casino networks

The TFS Approach to High-Tech Detection

Two Feather Solutions delivers passive, full-spectrum wireless visibility designed for gaming environments where integrity and revenue are paramount

Our solutions **detect and analyze RF activity across the casino floor**, even when devices never connect to your network.

No agents. No interference. No disruption to play.

What We Detect on the Casino Floor

Player-Side Cheating Tools

- **AR-enabled** smart glasses
- **Bluetooth** and cellular earpieces
- **Wearables** receiving real-time signals
- **Phones** in “no-phones” zones that are transmitting

Collusion & Side-Channel Communications

- Off-floor analysts feeding live instructions
- Temporary pop-up relay devices
- Rogue Wi-Fi access points
- Unauthorized cellular equipment
- Hidden transmitters near tables or slots
